Lifestyle Changes That May Improve Mitochondrial Function 1) Intermittent Fasting. Restricting calories and fasting intermittently, such as for fixed hours of the day, decreases energy levels in the body.To compensate, levels of NAD+ increase, which increases the ability of the mitochondria to produce ATP. This results in a subsequent rise in ATP levels due to improved mitochondrial function.

This simple activity is a great way to build both your problem-solving and creative thinking skills. 11. Keep a Creativity Journal . Start keeping a journal to follow your creative process and track the ideas you produce. A journal is a great way to reflect back on what you have accomplished and look for other possible solutions.

17 Ways to Develop Your Creativity - Verywell Mind

In terms of diet, try to avoid trans fats, as they can increase LDL cholesterol and lower HDL cholesterol levels. Foods prepared with shortening, such as cakes and cookies, often contain trans fats, as do most fried foods and some margarines. Limit saturated fat, found in meats and full-fat dairy products, as well. If you smoke, find a way to quit.
