Art historians describe the history of Western art in terms of successive periods and/or movements, including classical, medieval, Byzantine, Romanesque, Renaissance, baroque, rococo, neoclassicism, Romanticism, realism, Impressionism, modernism and postmodernism. Definitions of these periods are often debated, as it is impossible to pinpoint where they begin and end, or to account for the wide array of art produced within them.

The history of art in the Americas begins in pre-Columbian times with Indigenous cultures. Art historians have focused particularly closely on Mesoamerica during this early era, because a series of stratified cultures arose there that erected grand architecture and produced objects of fine workmanship that are comparable to the arts of Western Europe.

Learning about art through the ages has never been as interesting or fun as in this humorous and very informative graphic novel. As two kids give their grandpa a tour of Paris, he starts an interesting conversation with them--about where all the art they see in their lives--from the movie house to the stadiums to museums and even the subway-- started. Dad's impromptu history lesson goes back to the first Cavemen drawings to the pyramids of Giza, and by the end of the book includes Greco-Roman feats of ingenuity and the frescoes of the Renaissance. Recounted as a narrative about why different civilizations created different kinds of art, centuries of art history are explored entertainingly for young readers. Iconic works, such as Donatello's David and The Book of Kells, are included as well as architectural feats like the Colosseum. Written by a tour guide for museums and historic landmarks, the text is designed to entertain (with many funny asides and jokes) as it informs. The illustrations accurately portray the art and the artists described, with flavor and humor added to keep readers turning the page. Reproductions of the featured artworks and information about each piece are included in the back, along with a glossary of terms.

"[A] tart, funny, lurid little bomb of a book. one remembers, for sure, how we got our fur, but one story is that at an early meeting, an original Girl, a bad speller, wrote 'Gorilla' instead of 'Guerilla.' It was an enlightening mistake. It gave us our mask-ularity. Ever wonder about the abundance of naked male statues in the Classical section of your favorite museum? Did you know medieval convents were hotbeds of female artistic expression? And how did those "bad boy" artists of the twentieth century make it even harder for a girl to get a break? Thanks to the Guerrilla Girls, those masked feminists whose mission it is to break the white male stronghold over the art world, art history--as we know it--is history. Taking you back through the ages, the Guerrilla Girls demonstrate how males (particularly white males) have dominated the art scene, and discouraged, belittled, or obscured women's involvement. Their skeptical and hilarious interpretations of "popular" theory are augmented by the newest research and the expertise of prominent feminist art historians. "Believe-it-or-not" quotations from some of the "experts" are sprinkled throughout, as are the Guerrilla Girls' signature masterpieces: reproductions of famous art works, slightly "altered" for historic accuracy and vindication. This colorful reinterpretation of classic and modern art, as outrageous as it is visually arresting, is a much-needed corrective to traditional art history, and an unabashed celebration of female artists.

This book explores many issues raised by the range of ideas and images of the natural world in Western art since the Renaissance. The whole concept of landscape is examined as a representation of the relationship between the human and natural worlds. Featured artists include Claude, Freidrich, Turner, Cole and Ruisdael, and many different forms of landscape art are addressed, such as land art, painting, photography, garden design, panorama and cartography.
