The bodily changes that occur as adrenaline circulates throughout the blood is commonly called an adrenaline rush because these changes happen rapidly.

Adrenaline Rush: Symptoms, Activities, Causes, at Night ...  
Certain situations will trigger an adrenaline rush, which is the release of adrenaline from the adrenal gland. This defense mechanism causes an increased heart rate, sweating, and pupil dilation.

Adrenaline rush: Symptoms, causes, and meaning  
The gig at Pub Anchor has been moved to April 27. Come help us celebrate the release of our new album and warm up for the gig in Italy. Let's bring the house down!!

Adrenaline Rush Official  
The following can be attributed to an adrenaline rush: 1) Anxiety – They represent the body ' s reaction to any sort of stress it exposes itself to. What sets it apart is the chilling effects that we can get when we overreact to an intensive sensation such as an adrenaline rush.

Adrenaline Rush: Symptoms, Causes, and Meaning | Cleverism  
An adrenaline rush occurs when your adrenal glands produce a lot of adrenaline. This rush can manifest due to stress or anxiety. Adrenaline is an adrenergic amine. These substances stimulate the sympathetic nervous system (SNS). Specifically, adrenaline is a catecholamine. The adrenal glands produce adrenaline and, when it ' s released, it can affect your entire body. This release isn ' t voluntary.
