A 300-year-old pile of paleo poop has revealed an Arctic sled dog 's diet — or at least part of it. Scientists have extracted proteins from ancient frozen feces in Alaska and, in this case at least, ...

In a future ravaged by global warming, an innovative corporation creates a technology that can both cool the planet and provide a massive super-weapon, prompting airship pilot Anika Duncan to be swept up in an international plot.

Global warming has transformed the Earth, and it's about to get even hotter. The Arctic Ice Cap has all but melted, and the international community is racing desperately to claim the massive amounts of oil beneath the newly accessible ocean. Enter the Gaia Corporation. Its two founders have come up with a plan to roll back global warming. Thousands of tiny mirrors floating in the air can create a giant sunshade, capable of redirecting heat and cooling the earth's surface. They plan to terraform Earth to save it from itself—but in doing so, they have created a superweapon the likes of which the world has never seen. Anika Duncan is an airship pilot for the underfunded United Nations Polar Guard. She's intent on capturing a smuggled nuclear weapon that has made it into the Polar Circle and bringing the smugglers to justice. Anika finds herself caught up in a plot by a cabal of military agencies and corporations who want Gaia Corporation stopped. But when Gaia Corp loses control of their superweapon, it will be Anika who has to decide the future of the world. The nuclear weapon she has risked her life to find is the only thing that can stop the floating sunshade after it falls into the wrong hands. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

First in a new series from New York Times bestselling author Dale Brown, featuring U.S. Air Force intelligence officer Nick Flynn on the hunt for Russian commandos in the mountains of Alaska. After a CIA covert mission goes badly awry, U.S. Air Force intelligence officer Nicholas Flynn is exiled to guard a remote radar post along Alaska 's Arctic frontier. This dead-end assignment is designed to put his career permanently on ice, but Flynn 's not the type to fade quietly into obscurity... As winter storms pound Alaska and northern Canada, Russian aircraft begin penetrating deep into friendly airspace. Are these rehearsals for a possible first strike, using Russia 's new long-range stealth cruise missiles? Or is some other motive driving the Kremlin to take ever-increasing risks along the hostile Arctic frontier separating two of the world 's great powers? When an American F-22 collides with one of the Russian interlopers, things go south fast—in seconds, missiles are fired. There are no survivors. Despite horrific weather, Flynn and his security team are ordered to parachute into the area in a desperate bid to reach the crash sites ahead of the Russians. It 's now obvious that the Pentagon and CIA are withholding vital information, but Flynn and his men have no choice but to make the dangerous jump. Soon they 're caught in a deadly game of hide-and-seek with Spetsnaz commandos operating covertly on American soil. It seems that the F-22s and their Russian counterparts aren 't the first aircraft to have gone missing in these desolate mountains. The Kremlin is hunting for the first prototype of its new stealth bomber—which vanished on what was supposed to be a test flight...while loaded with nuclear-armed stealth cruise missiles. As Russia and the U.S. square off on the brink of all-out-war, it 's up to Nick to find the missing bomber...and prevent a potential nuclear holocaust.

Presents the author's journey from Yaak Valley in Montana to Alaska to explore the Arctic National Wildlife Refuge and to learn more about its animals and its people.

Short-listed for the 2012 Manitoba Young Reader 's Choice Award and Rocky Mountain Book Award, commended for the 2011 Best Books for Kids and Teens Mike Watson 's team has just won the Alberta Bantam Provincial box lacrosse championships. The euphoria of victory and plans for next season are short-lived when Mike 's father, a member of the Royal Canadian Mounted Police, is transferred to Inuvik, Northwest Territories. The transition to life inside the Arctic Circle is a tough one. With temperatures of -30 Celsius, a hulking monster named Joseph Kiktorak threatening him at every turn, and not a lacrosse ball in site, Mike 's resentment at moving north escalates. As his friendships with local youth develop, Mike is introduced to the amazing spectacle and athleticism of traditional "Arctic Sports." When his father witnesses the natural talent of Mike 's new friends, the idea of an Inuvik lacrosse team is born! With hearts full of desire, the motley group of athletes heads south to participate in the Baggataway Lacrosse Tournament, and to face Mike 's former team, The Rams.

" Dale Brown is a superb storyteller. " — W. E. B. Griffin In this thrilling geopolitical adventure from New York Times bestselling legend Dale Brown, Brad McLanahan and the Space Force must fight to preserve America 's freedom when ruthless enemies forge an unlikely alliance to control not only the earth, but the moon and beyond. Because its enemies never stop trying to undermine the United States ' security, the men and women who serve to protect America must always be vigilant. Few know this better than warriors Brad McLanahan and Nadia Rozek. Newly married, the two are just beginning to settle into their new life together when they are called back into action. Though the Russians were badly defeated by Brad and the Iron Wolf Squadron in their previous bid for world dominance, they are back and doubling down on their quest for control of outer space. In addition to their cutting-edge weaponry, they have a formidable new ally: China 's energetic and ruthless leader, President Li Jun. To protect America and the rest of the free world from the Russians and the Chinese, the Americans plan to mine the moon 's helium-3 resources, which will allow them to fully exploit the revolutionary fusion power technology Brad and his team captured from the Russians aboard the Mars One weapons platform. But Leonov and Li have devised a daring plan of their own. They are building a joint secret base on the moon 's far side fortified with a powerful Russian plasma rail gun that can destroy any spacecraft entering lunar orbit. If the heavily armed base becomes operational, it will give America 's enemies control over the world 's economic and military future. As this latest skirmish in the war for space accelerates, Brad, Nadia, and their compatriots in the Space Force must use their cunning and skill—and America 's own high-tech weaponry—to derail the Sino-Russian alliance and destroy their lunar site before it 's too late for the U.S. ... and the entire world.

China has emerged as a member of the elite club of nations who are powerful at both global poles. Polar states are global giants, strong in military, scientific, and economic terms. The concept of a polar great power is relatively unknown in international relations studies; yet China, a rising power globally, is now widely using this term to categorize its aspirations and emphasize the significance of the polar regions to their national interests. China's focus on becoming a polar great power represents a fundamental re-orientation - a completely new way of imagining the world. China's push into these regions encompasses maritime and nuclear security, the frontlines of climate change research, and the possibility of a resources bonanza. As shown in this book, China's growing strength at the poles will be a game-changer for a number of strategic vulnerabilities that could shift the global balance of power in significant and unexpected ways.

A dozen women join a secret 1850s Arctic expedition—and a sensational murder trial unfolds when some of them don't come back. Eccentric Lady Jane Franklin makes an outlandish offer to adventurer Virginia Reeve: take a dozen women, trek into the Arctic, and find her husband's lost expedition. Four parties have failed to find him, and Lady Franklin wants a radical new approach: put the women in charge. A year later, Virginia stands trial for murder. Survivors of the expedition willing to publicly support her sit in the front row. There are only five. What happened out there on the ice? Set against the unforgiving backdrop of one of the world's most inhospitable locations, USA Today bestselling author Greer Macallister uses the true story of Lady Jane Franklin's tireless attempts to find her husband's lost expedition as a jumping-off point to spin a tale of bravery, intrigue, perseverance and hope.

From the author of The Ice Master comes the remarkable true story of a young Inuit woman who survived six months alone on a desolate, uninhabited Arctic island In September 1921, four young men and Ada Blackjack, a diminutive 25-year-old Eskimo woman, ventured deep into the Arctic in a secret attempt to colonize desolate Wrangel Island for Great Britain. Two years later, Ada Blackjack emerged as the sole survivor of this ambitious polar expedition. This young, unskilled woman—who had headed to the Arctic in search of money and a husband—conquered the seemingly unconquerable north and survived all alone after her male companions had perished. Following her triumphant return to civilization, the international press proclaimed her the female Robinson Crusoe. But whatever stories the press turned out came from the imaginations of reporters: Ada Blackjack refused to speak to anyone about her horrific two years in the Arctic. Only on one occasion—after charges were published falsely accusing her of causing the death of one her companions—did she speak up for herself. Jennifer Niven has created an absorbing, compelling history of this remarkable woman, taking full advantage of the wealth of first-hand resources about Ada that exist, including her never-before-seen diaries, the unpublished diaries from other primary characters, and interviews with Ada's surviving son. Ada Blackjack is more than a rugged tale of a woman battling the elements to survive in the frozen north—it is the story of a hero.

A storm is coming.... Introducing a pulse-pounding technothriller by the New York Times bestselling author of Arctic Rising Prudence "Roo" Jones never thought he'd have a family to look after—until suddenly he found himself taking care of his orphaned teenage nephew. Roo, a former Caribbean Intelligence operative, spends his downtime on his catamaran dodging the punishing hurricanes that are the new norm in the Caribbean. Roo enjoys the simple calm of his new life—until an unexpected package from a murdered fellow spy shows up. Suddenly Roo is thrown into the center of the biggest storm of all. Using his wits—and some of the more violent tricks of his former trade—Roo begins to unravel the mystery that got his friend killed. When a polished and cunning woman claiming to be murdered spy's sister appears, the two find themselves caught up in a global conspiracy with a weapon that could change the face of the world forever. In Hurricane Fever, New York Times bestselling author Tobias Buckell (Arctic Rising, Halo: The Cole Protocol) has crafted a kinetic technothriller perfect for fans of action-packed espionage within a smartly drawn geo-political landscape. Roo is an anti – James Bond for a new generation. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.
