How to connect: potentiometer is connected to Arduinos ground and +5 and middle is connected to A0 analoq input. switch is connected to ground with 10 kOhms pull-down resistor and +5 and digital pin 7 . See picture below:

Flightgear, Arduino and Linux - Google Sites

The board has a Serial port selector toggle switch that changes the Serial port number the ESP8266 and Mega2560 chips are communicating on, RXD3/TXD3 setting uses Serial3 port and RXD0/TXD0 uses Serial.. I recommend using RXD3/TXD3 setting to separate the ESP-Arduino communication from the Arduino's Serial output. Make sure the Arduino's physical output pins of Serial3 on 15 (RX3) and 14 ...
