Barrier Free Design - SlideShare

An example of barrier-free design would be installing a ramp for wheelchairs alongside or in place of steps. In late 1990s any element which could make the use of the environment inconvenient was considered a barrier, for example poor public street lighting. In the case of new buildings, however, the idea of barrier free modification has largely been superseded by the concept of universal ...

Universal design - Wikipedia

What is universal design? And where lies the difference between barrier-free design and universal design? One can answer this question from different viewpoints. This paper attempts to answer the question from the Far East, where the idea came later

(PDF) From Barrier-Free to Universal Design: An ...

Barrier-free design, therefore, is a professional obligation as well as a societal commitment of design professionals. Though unintended, most of our buildings today remain inaccessible to many. This is largely due to the lack of conscious efforts, concerns for the disabled and lack of basic information on what constitutes an accessible design.

DESIGN MANUAL FOR A BARRIER- FREE BUILT ENVIRONMENT

The term barrier-free design was first used in the 1950's to describe the effort of removing physical barriers from the "built environment" for people with disabilities. Barrier-free design addresses the issue of access.
