**Answer Key**  
Describe how the theory of evolution by natural selection is supported by evidence. The evidence for evolution is compelling and extensive. Looking at every level of organization in living systems, biologists see the signature of past and present evolution. Darwin dedicated a large portion of his book, *On the Origin of*

# Download Ebook Biology Evidence Of Evolution Lab

Species, to identifying patterns in nature that were consistent with evolution, and since Darwin, our understanding has become clearer and broader.

Answer Key  
generates real simulation data that can be exported or printed.

## ~~Evolution Lab - Biology in Motion~~

Supported by evidence from many scientific disciplines, Darwin ' s theory of evolution states that heritable variations occur in individuals in a population;

# Download Ebook Biology Evidence Of Evolution Lab

because of competition for resources, individuals with more favorable phenotypes are more likely to survive and reproduce, thus passing traits to offspring.  
Investigaton 1: Artificial Selection

~~AP Biology Labs~~

Another type of evidence for evolution is

# Download Ebook Biology Evidence Of Evolution Lab

the presence of structures in organisms that share the same basic form. For example, the bones in the appendages of a human, dog, bird, and whale all share the same overall construction (Figure 11.3.2). That similarity results from their origin in the appendages of a common ancestor.

The evidence for evolution from molecular biology is overwhelming and is growing quickly. In some cases, this molecular evidence makes it possible to go beyond the paleontological evidence. For example, it has long been postulated that whales descended from land mammals that had returned to the sea.
