The UK has traditionally been a driver for more ambitious climate policy at the EU level and Brexit could slow down the EU ' s progress. At home, however, there are concerns that Brexit negotiations will divert attention from it and that the lack of external pressure from the EU will allow the government to weaken climate regulations.

UK environmental policy has been profoundly shaped by EU membership, and Brexit raises wide ranging implications for the shape and ambition of UK environmental governance. Many in the environmental sector expressed concern that Brexit would herald weaker environmental and food safety standards, especially if the government privileged a trade deal with the US over one with the EU.

The environmental governance gap. A clear advantage offered by the EU as a venue for environmental policy making is that it is a transnational forum that brings states together. Environmental pollution does not respect boundaries: species migrate, and the grand environmental challenges, such as climate change, require collaborative action.
