Copyright is an automatic right assigned to the creator of any piece of original work. This could be one person, multiple people or a company. Copyright allows the owner to control how their work is used. A copyright owner has the exclusive right to copy, distribute, perform, broadcast or adapt a work. Anyone who wants to reproduce copyrighted work must seek permission from the copyright holder, or check whether the owner has permitted particular use through a licence.

In this book, leading scholars analyze the important role played by copyright exceptions in economic and cultural productivity.

Federica Giovanella examines the on-going conflict between copyright and informational privacy rights within the judicial system in this timely and intriguing book.

It has become the practice to claim copyright protection for virtually every piece of 'writing' or its electronic equivalent, created by knowledge professionals - from business plans for a start-up company to the instruction manual for use of a motorized saw and to specifications for pipeline tenders. This paper posits that the legal doctrine of copyright was never intended, and is not equipped, to regulate the very building block of our society-information. When used to protect utilitarian information products (UIW) en masse, copyright can impede the flow of information necessary for innovation, foster waste in the form of redundant creation and adversely impact competition in the market.

The book takes a look at the six most important current topics arising from copyright law in the information society, and for each topic provides an in-depth introduction that compares the approaches

taken in Europe and the US. Each topic is introduced by an expert, and the issues are then analysed in separate country reports representing nine Asian jurisdictions: China, Taiwan, Hong Kong, Japan, Korea, Singapore, Malaysia, Thailand and the Philippines. The six topics are: The Expansion of Copyright Law and its Social Justification: Introduction by Reto Hilty, Max Planck Institute, Munich Internet Trade, Digital Works and Parallel Imports: Introduction by Christopher Heath, European Patent Office, Munich The Collective Exercise of Copyrights: Introduction by Kung Chung Liu, Academia Sinica, Taiwan The Law on Anti-Circumvention and Digital Rights Management: Introduction by Andy Sun, National Chenchi University, Taipei, Taiwan and Zhi Wei, Peking University, Beijing Copyright Contracts, Public Policy and Antitrust: Introduction by Estelle Derclaye, Queen Mary University of London Contributory and Vicarious Liability for Copyright Infringement: Introduction by Andy Sun, National Chenchi University, Taipei, Taiwan

This book explores how restrictive copyright laws deny access to information for the print disabled, despite equality laws protecting access. It contributes to disability rights scholarship and ideas of digital equality in analysis of domestic disability anti-discrimination, civil, human and constitutional rights, copyright and other reading equality measures.

The book includes: viable restatements of the rationales of copyright protection for the emerging IP environment; new insights into the relationship between copyright protection and copyright limitations; in-depth explanation of the structure and functioning of the three-step test; detailed interpretations of each criterion of the test; discussion of the two WTO panel reports dealing with the test; a proposal for the further improvement of the copyright system and the international rules governing copyright law;

detailed information about international conference material concerning the test; and discussion of potential future trends in copyright law. The author provides many examples that demonstrate the test's impact on different types of limitations, such as private use privileges and the U.S. fair use doctrine. He explains the test's role in the European Copyright Directive.

Copyright in a Global Information Economy explores the full range of copyright law and its relationship to technological innovations and globalization. Written with precision and clarity, this ambitious yet manageable casebook elucidates the fundamental disputes of copyright law with incisive and balanced perspective. The book features comprehensive coverage of domestic and international copyright law, a balanced treatment of controversial issues, as well as a wide selection of concisely edited cases, engaging and practical examples and discussions, and photographs that facilitate and stimulate discussion of cases. Key Features of the New Edition Reorganization of materials on the copyright owner's exclusive rights New section on copyright due diligence, licensing, and litigation Updated, streamlined notes and questions Practice exercises designed to engage students from a variety of perspectives including advocacy, client counseling, and legislative Drafting

An excellent account of practice on both sides of the Atlantic regarding the intersection of antitrust and intellectual property rights. The author provides a detailed account of the legal discussion in an economics-informed manner. A must read, as far as I am concerned, for practitioners and academicians alike. Petros C. Mavroidis, Columbia Law School, New York, US, University of Neuch'tel, Switzerland

and CEPR, UK This book examines the growing divergences between the EU and the US in their approach to antitrust law enforcement, particularly where it relates to intellectual property (IP) rights. The scope of US antitrust law as defined in the Supreme Court's decisions in *Trinko* and *Credit Suisse Securities* is much narrower than the scope of EU competition law. US antitrust enforcers have become increasingly reluctant to apply antitrust rules to regulated markets, whereas the European Commission has consistently used EU competition rules to correct the externalities resulting from government action. The contrasting approaches adopted by US and EU antitrust enforcers to these issues, as with the differences in addressing market dominance, have had a profound impact on the scope of antitrust intervention in the IP field. This book provides an in-depth analysis of the relevant recent developments on both sides of the Atlantic and identifies the pitfalls of regulating IP through competition rules. With a unique comparative perspective, this book will be an invaluable resource for postgraduate students, academics and practitioners in IP and competition law.

Data for Science and Technology covers the proceedings of the Seventh International CODATA Conference. This text is comprised of 133 chapters with a total of 180 papers from 400 hundred authors, which cover CODATA concerned with environmental and energy questions along with problems of data banking and telecommunications network operations. This book provides valuable assessment of data and points out alternatives, trends, and requirements for the future, such as production and use of data in pure applied sciences; data for the development of human settlements in a dynamic world; informatical analysis of scientific research activities; and data on our evolutionary heritage. Researchers from all scientific fields will find this book a great source reference material, since it presents research from various disciplines.
