Darwin's theory of evolution by natural selection ...

Evolution is referred to as a theory because it is a well-supported explanation of phenomena that have occurred in the natural world. What is a fossil? A fossil is the preserved remains of an ancient organism.

Access Free Darwin Theory

Darwin found fossils of many organisms that were different from any living species.

Darwin's Theory of Evolution Flashcards | Quizlet

Darwin said that some are born with long necks that would spread through the population.

Access Free Darwin Theory

Eventually, a new species, with long necks evolved.

Lamarck's idea was that each would have to undergo separate, internal change.

Darwin's theory says that within a population, changes occur as the balance of new inherited traits spread across the population.

Darwin's Theory of
Evolution in 5 Easy
Points You'll ...

Darwin defined evolution as a process of "descent with modification." He believed that some organisms within a species have trait variants that make them fitter and more likely to reproduce.

Access Free Darwin Theory

Over time, inherited modified traits become dominant in the population, and a new species may emerge.
