'Skewed Views Too' continues Roy Schlemme's cartoon exploration of our human faults and foibles. Using everything from wry wit to out-and-out broad slapstick, he intelligently takes the reader on a rambling, merry journey. Beginning, at times, with the most bizarre of premises, Schlemme quickly cajoles even the most somber of us into forgetting our personal problems and laughing out loud at the adventures of his eccentric cast of zanies. Unlike other more traditional cartoonists who, generally, of necessity work small and simple, Schlemme utilizes the larger page along with a more detailed drawing style to enhance the final effect upon readers. There's no single theme from one vignette to the next, but rather a lively bouncing around certain to capture even the most humor-resistant of us. 'Skewed Views Too', with over 150 humorous situations, is sure to find itself one of the more appealing gift-giving ideas and entertaining book options around.

Covers a wide variety of driving situations and provides advice on how to handle them, including such topics as night driving, coping with road rage, handling breakdowns, and avoiding crashes.

Senior Drivers! Your future is in jeopardy. A disturbing situation is developing in the United States. Since people are living longer, the number of drivers over 65 is escalating three times as rapidly as the general driving population. Older people have difficulty concentration, shorter attention spans and failing vision among other ailments. Unfortunately this results in frequent

driving mishaps, sometimes with catastrophic results. Taking away their driving privileges would deprive them of their self esteem and independence. This could happen if they continued to have accidents caused by their propensity to get distracted easily and lose concentration. Some states have already enacted laws requiring re-exams for seniors. No doubt many more will follow. Driving slower in traffic is not the answer. This could cause accidents. Driving too fast would be worse since a person's attention span and reaction time deteriorate with age. It does not matter how skillful he or she once were, aging diminishes skill in almost all areas including the operation of a motor vehicle. Driving today has become more complex as many more cars are on the road. When seniors started to drive, turnpikes and expressways were non existent. After observing the avoidable accidents seniors were having, and realizing how their ranks were exploding, I decided to write "The Senior Driver's Survival Guide" – subtitled What You Must Know to Protect Your Driving Privileges. Its contents can enable older drivers to drive with a more acute awareness and help them to be better drivers in their "Golden" years. It is an important book which has the power to change and save lives.

invaluable as you study and prepare for practice. Other useful tools are included, such as web links for suggested further reading. The book will answer questions such as: ? Is this the right career for me? ? What do I need to consider when choosing a university and programme of study?? What will I be studying?? How can I make the most of the simulations that are part of my course?? Who is there to support me on placements?? What is it like caring for patients and their families?? How can I adjust to shift work?? What can I do to prepare for registration and securing my first job? The book also includes advice on making the most of your preferred learning style and guidance on how to look after yourself when you encounter traumatic events. Written by a bestselling author with the help of students, practice staff and academics from a variety of higher education institutions, this guide for prospective and current student paramedics is the essential resource to support your journey through the excitement, challenges and realities of being a student paramedic on a higher education programme. "This is a must buy for any student from school leaver to the mature candidate who is thinking of studying to be a Paramedic. The book comprehensively addresses everything from where and how to apply, unpicking the complex picture of fees and funding to the realities of what to expect when you get to University and what it's like on placement. With valuable contributions from current students, academics and educators this book explains everything you need to know and might not have thought you needed to know before you apply." Mark Nevins, Senior Lecturer, Teeside University, UK, and NMC Registered Adult Nurse and HCPC Registered Paramedic "I would consider this book as required reading for anyone considering embarking on a career as a paramedic. It is honest, informative and true to life. I liked the way that all aspects of student life were covered, from applications, to studying and placements and finally

being out in the world. This job isn't what a lot of people seem to think it is but Amanda has gone to great lengths to myth bust. This book shows a depth and consideration that all prospective paramedic students should appreciate. It is clear that a great deal of effort has gone into this survival guide." Mark Young, Paramedic & Practice Placement Educator, South East Coast Ambulance Service, UK "I liked the way that the book utilises a cross-section of students, practitioners and academics when providing opinions on the student paramedic journey, as this provides the triangulation required to ensure the views presented are representative of the student paramedic arena. It will provide a useful guide to the mysteries of the student journey. It is also useful that it illustrates the differences across the whole of the UK and considers the different approaches and how they can change the coping mechanisms that need to be used, and that are in place. The 4 sections provide an excellent overview of the 4 areas that most student paramedics want to, and need to, know, and answers a number of the questions (if not all) asked very effectively. The sections also support the needs of the profession, as well as the students own professional journey; covering a number of areas that are part of the institutional and ambulance Trusts inductions. It is useful to note that the Survival Guide also recognises the differences the student paramedic experiences when compared to other students in universities. This means that the Survival Guide can act as an 'aide memoire' that is available when those difficult questions come up that need an immediate answer that can allay fears and anxieties and signpost the students to the places they can get support. This aspect is helped by the shared experiences from past and present students and practitioners, who act as mentors and paramedic educators to the students. This book has been a long time coming and will, based on my experience, help the student to have a better

transition towards their future professional role." Lizzie Ryan, Education Business Manager and Clinical Training Manager (East) at South Western Ambulance Service NHS Foundation Trust, UK, also Lecturer at Bournemouth University, UK and Plymouth University, UK and the Open University, UK
