Plant pathology

(phytopathology) is the study of the nature, causes, prevention and socioeconomic aspects of plant diseases.

Plant diseases are recognized by symptoms such as necrosis (death of cells or tissues), chlorosis (yellowing), wilting (shoot and leaf drooping), rot, dwarfing, tumefaction (formation of gall or localized swelling), bronzing or damping-off (plant toppling), etc. Plant diseases are separated into nonparasitic (noninfectious, nontransmissible) and parasitic (infectious ...
