Freshwater

“temperate” species;
that is, they will tolerate
cold winter conditions.
Both species, however,
possess a number of
traits that are usually
associated with animals
that live in warm waters.

The crayfish used in the form of fish bait and crayfish introduction into streams and natural lakes is illegal in many different states. The transport and importation of crayfish is regulated to limit the nonnative species introduction, which will end up eliminating the fish and native crayfish, Similar to Red Swamp

Freshwater

synonym 'redclaw', is a tropical species native to the rivers of north-west Queensland and the Northern Territory in Australia. Although well known to the local inhabitants of this isolated region, it remained effectively unknown to the rest of the world until the late 1980s, when it was trialled for aquaculture.
