Evidence includes all means of proof, including oral statements, written records (documents), demonstrations, physical objects, and the like. Arguments or submissions that a party makes to persuade WCAT to view the appeal in a particular way are not evidence. You can introduce evidence in two ways: orally (verbal statements made by witnesses at an oral hearing) or in writing (any form of written or printed record, including the worker's claim file or the employer's assessment file).

Objective Medical Evidence. Objective evidence is evidence that is not based on your statements. Instead, objective evidence is medical tests. These tests include x-rays, MRIs, nerve conduction studies, CT scans, arterial studies, and echocardiograms. SSA places great weight on objective evidence. This is probably because these objective studies do not lie or exaggerate.

At this stage, you may be asked to provide additional evidence to help us complete the decision. If we need additional evidence it may delay your Access Request decision. For more information on how we consider evidence of disability, visit our Operational Guidelines: Access to the NDIS section.

**Providing evidence of your disability | NDIS**

A combination of detailed factual evidence from the applicant and focussed medical evidence which concentrates on the most relevant matters will allow the case to be put at its best.

**What's up Doc? The role of medical evidence in disability---**

Providing evidence of your medical treatment will allow you to prove part of your damages or injuries in your claim. Medical bills and records are used in practically every personal injury claim because they establish a consistent account of when and where you were treated, which providers you were treated by, and what treatment you received. With this in mind, make sure that you seek medical attention after the accident.
