Accessibility is shaped by the structure, capacity and connectivity of transportation infrastructure, which is not uniform. Since accessibility differs, this attribute has an impact on land use, such as the location of new activities, their expansion or densification.

Systems on Land-use For

Land Use Impacts of Transportation
Investments - Highway and Transit.

This chapter explores the relationship
between transportation and land use.

It examines the theoretical basis for
expecting transportation to influence
land use, and it determines the extent
to which such impact can be

documented. It should be noted that
the primary focus of this chapter is the
impact of transportation on land use,
not the impact of land use on travel or
transportation.

Land Use Impacts of Transportation

In automobile-dependent cities, 35 to 50% to land-use footprint is accounted for by roads and parking lots. Within a parking lot, about 40% of the surface is devoted to parking vehicles, while the remaining 60% is for circulation and access to individual parking spaces.

influence land use directly, by affecting the amount of land used for transport facilities, and indirectly, by affecting the location and design of development. For example, expanding urban highways increases pavement area, and encourages more

Evaluating Transportation Land Use Impacts

In fact, research dating back at least to the 1950s has found over and over that highway construction in the urban periphery is associated with more housing construction there—and the depopulation of urban neighborhoods. It's the land use side of induced demand: part of the way that highways fill themselves up with cars is by creating demand for housing near them.

The Ada County Highway District (ACHD), the cities and Ada County are working together to better link land-use and transportation planning. This vision, Livable Streets for Tomorrow (also known as the Transportation and Land Use Integration Plan), says what streets in Ada County should function and look like in the future.

Read Book Land Use And Transportation Highway

Integration Plan

The precise relationship between transportation and land use continues to elude us. It seems self-evident that transportation facilities and services have enormous effects on land use patterns. We've all observed developments occur around freeway interchanges, and we all know the history of automobile-oriented suburban development.
