Mumia Abu-Jamal is an award-winning journalist and author of three well-received books and many essays. He is also a death-row inmate, awaiting execution in Pennsylvania for allegedly killing a police officer in 1981. For many around the world, he is

an inspired leader and the centerpiece to a revived progressive movement critical of our justice system and escalating global economic inequities. For others, he is a cold-blooded killer who has duped millions, including a vast array of Hollywood celebrities, writers, intellectuals and world political leaders, into believing that he is a political prisoner falsely imprisoned. Whatever the outlook, he and his case have become a flashpoint in the ever-raging debate over capital punishment in this country and a symbol of what is wrong with our criminal

justice system. Here, for the first time, the story of Mumia Abu-Jamal's trial and his struggle to gain his freedom has been told.

Executing Justice takes us inside the courtroom where a fierce and skilled

prosecutor wove a damning narrative of a young black radical who brutally

murdered a young white police officer in the red-light district of

Philadelphia, and then later boasted about the killing.

It was, the prosecutor said, the strongest murder case he's ever tried.

Daniel R. Williams, defense lawyer and chief legal strategist for Mumia Abu-Jamal, invites us

to ask: why has this case engendered such enormous attention and aroused the passions of people worldwide? Executing Justice is the story of how the death penalty really works in this country—not from the perspective of appellate judges, academics, or politicians who pontificate about the pros and cons of capital punishment, but from ground zero, within the pit of the courtroom where the war over life and death is fought. It is also a story of one of the most remarkable trials in our history. Above all, Executing Justice is an honest, at times

confessional, book that seeks not to preach, but to raise questions about what we expect from our legal system and the depth of our commitment to capital punishment as a form of executing justice.

In this book a group of international experts guide the reader through the clinical features of adults with autism spectrum disorders, describe the care needs of patients and their families, explain the evolution of the disorders into old age, and highlight what can be done to help. Detailed attention is paid to the medical and

psychiatric problems of adults with these disorders and the approach to their education and professional integration. In addition, expert neuroscientists summarize current views on the neurobiology of autism. Autism spectrum disorders are devastating neurodevelopmental disorders. Although diagnosis and therapeutic interventions usually take place in infancy, they are chronic lifelong conditions. Surprisingly, the literature on autism spectrum disorders in adults is scarce. Moreover, most mental health professionals working with adults have little training

in autism, and adult mental health services around the world are rarely prepared to address the needs of these patients, which tend to increase with age. This book therefore fills a crucial gap in the literature and will prove useful for all who care for and deal with adults in the Autistic Spectrum.

chapter addresses a particular theme, issue, or situation in a problem-oriented and case-based manner that emphasizes the differences between routine and bio-psycho-social care. Relevant facts and figures are presented, advice is provided regarding the medical, psychological, and caring process, and contextual aspects are discussed. The book offers practical tips and actions within the bio-psycho-social approach, and highlights important do's and don'ts. To avoid a strict somatic thinking pattern, the importance of communication, multidisciplinary
