Central nervous system tumor -
Wikipedia

A primary central nervous system lymphoma (PCNSL), also termed primary diffuse large B-cell lymphoma of the central nervous system, is a primary intracranial tumor appearing mostly in patients with severe immunodeficiency (typically patients with AIDS). It is a subtype and one of the most aggressive of the diffuse large B-cell lymphomas.

System Tumors" and "glia."

Tumors that start from neurons include medulloblastoma and primitive neuroectodermal tumors (PNETs).

Tumors that start from glia include glioma, astrocytoma, oligodendroglioma, and ependymoma.

Central Nervous System Tumors (Brain and Spinal Cord ...

Primary melanocytic tumors of the central nervous system (CNS) represent a spectrum of rare tumors. They can be benign or malignant and occur in adults as well as in children, the latter often in the context of neurocutaneous melanosis. Until recently, the genetic alterations in these tumors were largely unknown.
