Reinforcement Learning By Richard S

a learning system that wants something, that adapts its behavior in order to maximize a special signal from its environment. This was the idea of a "he-donistic" learning system, or, as we would say now, the idea of reinforcement learning. Like others, we had a sense that reinforcement learning had been thor-

Introduction to Reinforcement Learning | Guide books

All of the thoughts here are gathered from different sources including my own experience and thinking on the topic. But I must spotlight the source I praise the most and from which I draw most of the knowledge — “ Reinforcement learning: An Introduction ” by Richard S. Sutton and Andrew G. Barto. This is one of the very few books on RL and the only book which covers the very fundamentals and the origin of RL.
