RHS How Does My Garden Grow? By Royal Horticultural ...

Watering is key to growing plants well, so here we look at how to get it just right. This not only means providing the water our gardens need, but using it wisely. Water is a precious resource and supplies in the UK are under pressure from the effects of climate change, population increase and the need to protect the environment, such as river levels for wildlife.

Composting / RHS Gardening

Raised beds are a great way of growing a wide range of plants, and are particularly popular for growing fruit and vegetables. They are a good way of boosting drainage and can be used to introduce a different soil type to your garden. Raised beds are also a useful way to garden if you have restricted mobility, as they reduce the need to bend.

Liming garden soil reduces the acidity of the soil by increasing the pH level. Plants can't get the nutrients they need from soil that is too acid, and some materials such as aluminium can be at toxic levels in very acid soils. The pH level is a number that describes how acid or alkaline a soil is and from this it is calculated how much lime is needed to reduce acidity.

Grow Social / RHS Campaign for School Gardening

You could write letters to parents, garden centres, seed companies and supermarkets asking for donations of money towards the school garden, plants, seeds, tools or help. Ask your pupils to write the letters as a literacy task. Don't forget - you need tools. You may require specially adapted tools. Find more fun ways to fundraise here.
