For second and third year introductory communication systems courses for undergraduates, or an introductory graduate course. This revision of Couch's authoritative text provides the latest treatment of digital communication systems. The author balances coverage of both digital and analog communication systems, with an emphasis on design. Students will gain a working knowledge of both classical mathematical and personal computer methods to analyze, design, and simulate modern communication systems. MATLAB is integrated throughout.

A common man's journey... YOUR ROAD MAP TO ACHIEVING FINANCIAL FREEDOM AND LIVING YOUR DREAMS Financial freedom is not defined by your net worth or your social status. It does not matter how much you earn – what matters is how much you can save and invest wisely. The secret to financial freedom is learning the basic concepts of planning well and adopting the right attitude. But how does one achieve this? Written by a common man for the common man, this book will help you lead a financially independent and conscious life. Everyone around us is trapped in a mindless rat race. If you've resolved to take control of your finances and construct a personal finance plan, From the Rat Race to Financial Freedom is a good starting point.

Under the label of "the socialist market economy with Chinese characteristics," the Chinese Government has made a firm commitment to economic reform, though still retaining tight political control. Thus, under conditions of liberal economic systems and autocratic rule, a new capitalist system is emerging in China; its top companies are managed by private entrepreneurs, government bodies or a combination of both. This book, presented in an easily accessible format, fills an important gap in the growing literature on China in the global economy and provides a research reference tool on China's top companies. It contains a comprehensive directory listing of the Top 100 corporations in China, thus enhancing the research potential on China for students, researchers and businesses is alike. As a general reference guide to the Chinese economy, A Guide to the Top 100 Companies in China provides up-to-date and comprehensive coverage of the top Chinese enterprises. Corporations from Hong Kong and Taiwan that conduct significant business in China are also included.

This book reviews macrocycles in drug discovery, both those of natural origin and semi-synthetic derivatives of natural products, and those designed and synthesized based on principles of medicinal chemistry. The medicinal chemistry of macrocyclic natural products is interesting in itself, but lessons learned from these compounds, in terms of the relationship between structure and desirable physicochemical properties, are now informing the design of fully synthetic macrocyclic drug candidates against a variety of targets including kinases, ATPases, proteases, GPCRs and others. Furthermore, as more non-classical drug targets, such as protein-protein interactions, are pursued in the pharmaceutical industry, macrocyclic molecules are generating increasing interest as they offer a way to provide drug-protein interactions that cover a larger surface area than traditional small molecules. A variety of macrocycles have become important drugs or have been identified as leads to marketed drugs. This text will discuss these compounds, their pharmacology and synthesis, in the context of their broad chemotype as compounds composed of large rings. Providing a wide reaching review of this important area in a single volume, this book will be of interest to biochemists, pharmaceutical scientists and medicinal chemists working in industry or academia.

In 2000, Jakob Nielsen, the world's leading expert on Web usability, published a book that changed how people think about the Web—Designing Web Usability (New Riders). Many applauded. A few jeered. But everyone listened. The best-selling usability guru is back and has revisited his classic guide, joined forces with Web usability consultant Hoa Loranger, and created an updated companion book that covers the essential changes to the Web and usability today. Prioritizing Web Usability is the guide for anyone who wants to take their Web site(s) to next level and make usability a priority! Through the authors' wisdom, experience, and hundreds of real-world user tests and contemporary Web site critiques, you'll learn about site design, user experience and usability testing, navigation and search capabilities, old guidelines and prioritizing usability issues, page design and layout, content design, and more!

Offers a collection of true facts about animals, food, science, pop culture, outer space, geography, and weather.

The electrochemical energy storage is a means to conserve electrical energy in chemical form. This form of storage benefits from the fact that these two energies share the same vector, the electron. This advantage allows us to limit the losses related to the conversion of energy from one form to another. The RS2E focuses its research on rechargeable electrochemical devices (or electrochemical storage) batteries and supercapacitors. The materials used in the electrodes are key components of lithium-ion batteries. Their nature depend battery performance in terms of mass and volume capacity, energy density, power, durability, safety, etc. This book deals with current and future positive and negative electrode materials covering aspects related to research new and better materials for future applications (related to renewable energy storage and transportation in particular), bringing light on the mechanisms of operation, aging and failure.

• The first book to explain how feng shui developed from the Taoist systems of astrology, yin and yang, and the five elements. • Provides a background on Taoist philosophy to help readers better understand the principles of feng shui and how to use them properly. • Helps readers improve home, business, garden, property, neighborhoods, and much more. The Chinese art of feng shui has become extremely popular in the West, but too often advice on the subject consists of overly simplistic instructions for rearranging one's house without any explanation of the profound philosophical system behind these changes. The ancient Taoists developed feng shui from their understanding of the subtle interplay of energies that make up the universe, and no true mastery of feng shui is possible without a knowledge of Taoism. Taoist Feng Shui provides step-by-step guidelines for improving your home, business, garden, property, and neighborhood using this ancient system of knowledge. In Taoist Feng Shui, Susan Levitt traces the history of feng shui and shows how it is grounded in knowledge of yin and yang and the five Taoist elements of fire, earth, metal, water, and wood, as well as many other principles essential to Taoism. Once a background in Taoism is established, readers can better understand the philosophy behind concepts such as choosing the best colors for each room of the home, room-by-room furniture placement, yin and yang balance, correct lighting, outdoor landscaping, the function of hallways and entrances, and the proper use of mirrors, crystals, fountains, and other feng shui tools. With in-depth examples from the author's private feng shui practice, Taoist Feng Shui can help all readers transform their personal environments to create peace, harmony, health, wealth, and good fortune.

This comprehensive introduction to principles underlying laser light scattering focuses on time dependence of fluctuations in fluid systems; also serves as introduction to theory of time correlation functions. 1976 edition.
