Included in Backchannel’s WIRED.com) “Top Tech Books of 2017” An “important” book on the “pervasive influence of Silicon Valley on our economy, culture and politics.” —New York Times How the titans of tech’s embrace of economic disruption and a rampant libertarian ideology is fracturing America and making it a meaner place In The Know-It-Aills former New York Times technology columnist Noam Cohen chronicles the rise of Silicon Valley as a political and intellectual force in American life. Beginning nearly a century ago and showcasing the role of Stanford University as the incubator of this new class of super geeks, Cohen shows how smart guys like Jeff Bezos, Peter Thiel, Sergey Brin, Larry Page, and Mark Zuckerberg fell in love with a radically individualistic ideal and then mainstreamed it. With these very rich men leading the way, unions, libraries, public schools, common courtesy, and even government itself have been pushed aside to make way for supposedly efficient market-based encounters via the Internet. Donald Trump’s election victory was an inadvertent triumph of the “disruption” that Silicon Valley has been pushing: Facebook and Twitter, eager to entertain their users, turned a blind eye to the fake news and the hateful ideas proliferating there. The Rust Belt states that shifted to Trump are the ones being left behind by a “meritocratic” Silicon Valley ideology that promotes an economy where, in the words of LinkedIn founder Reid Hoffman, each of us is our own start-up. A society that belittles civility, empathy, and collaboration can easily be led astray. The Know-It-Aills explains how these self-proclaimed geniuses failed this most important test of democracy.

33,000 pages 44 million words 10 billion years of history 1 obsessed man Part memoir and part education (or lack thereof), The Know-It-All chronicles NPR contributor A.J. Jacobs’s hilarious, enlightening, and seemingly impossible quest to read the Encyclopaedia Britannica from A to Z. To fill the ever-widening gaps in his Ivy League education, A.J. Jacobs sets for himself the daunting task of reading all thirty-two volumes of the Encyclopaedia Britannica. His wife, Julie, tells him it’s a waste of time, his friends believe he is losing his mind, and his father, a brilliant attorney who had once attempted the same feat and quit somewhere around Borneo, is encouraging but, shall we say, unconvincd. With self-deprecating wit and a disarming frankness, The Know-It-All recounts the unexpected and comically disruptive effects Operation Encyclopedia has on every part of Jacobs’s life -- from his newly minted marriage to his complicated relationship with his father and the rest of his charmingly eccentric New York family to his day job as an editor at Esquire. Jacobs’s project tests the outer limits of his stamina and forces him to explore the real meaning of intelligence as he endeavors to join Mensa, win a spot on Jeopardy!, and absorb 33,000 pages of learning. On his journey he stumbles upon some of the strangest, funniest, and most profound facts about every topic under the sun, all while battling fatigue, ridicule, and the paralyzing fear that attends his first real-life responsibility -- the impending birth of his first child. The Know-It-All is an ingenious, mighty entertaining memoir of one man’s intellect, neuroses, and obsessions and a soul-searching, ultimately touching struggle between the all-consuming quest for factual knowledge and the undeniable gift of hard-won wisdom.

Winner • National Council of Teachers of English - George Orwell Award for Distinguished Contribution to Honesty and Clarity in Public Language The “philosopher of truth” (Jill Lepore, The New Yorker) returns with a clear-eyed and timely critique of our culture’s narcissistic obsession with thinking that “we” know and “they” don’t. Taking stock of our fragmented political landscape, Michael Patrick Lynch delivers a trenchant philosophical take on digital culture and its tendency to make us into dogmatic know-it-aills. The internet—where most shared news stories are not even read by the person posting them—has contributed to the rampant spread of “intellectual arrogance.” In this culture, we have come to think that we have nothing to learn from one another; we are rewarded for emotional outrage over reflective thought; and we glorify a defensive rejection of those different from us. Interweaving the works of classic philosophers such as Hannah Arendt and Bertrand Russell and imposing them on a cybernetic future they could not have possibly even imagined, Lynch delves deeply into three core ideas that explain how we’ve gotten to the way we are: • our natural tendency to be overconfident in our knowledge; • the tribal politics that feed off our tendency; • and the way the outrage factory of social media spreads those politics of arrogance and blind conviction. In addition to identifying an ascendant “know-it-all-ism” in our culture, Lynch offers practical solutions for how we might start reversing this dangerous trend—from rejecting the banality of emotions that rarely reveal insight to embracing the tenets of Socrates, who exemplified the humility of admitting how little we often know about the world, to the importance of dialogue if we want to know more. With bracing and deeply original analysis, Lynch holds a mirror up to American culture to reveal that the sources of our fragmentation start with our attitudes toward truth. Ultimately, Know-It-All Society makes a powerful new argument for the indispensable value of truth and humility in democracy.

As part of the unique, science Know-It-Aills! Series that features stunning covers and engaging text, this book puts the spotlight on Bats! Did you know that the bat is the only kind of mammal that can fly? In fact, some bats can only fly, they cannot walk. From tip to tip, some kinds of bats, like Giant Flying Foxes, have a wingspan as wide as 6 feet (2 m). But there are also tiny bats, like Bumblebee Bats, with wingspans of only 6 inches (15 cm)—smaller than the length of a new pencil. There is so much to learn about these fascinating creatures. Awesome life-like illustrations and informative stat boxes, filled with interesting facts, make this 24-page book fun and exciting for young science enthusiasts age 4 and up! Titles in the Know-It-Aills! Series include: Butterflies, Crocodiles, Dinosaurs, Farm Animals, Safari Babies, Snakes, Sharks, Spiders, Whales, Wolves, Puppies, Wild Cats, Bugs, Birds of Prey, Fish, Frogs, Apes, Seals, Bats, Bears, Predators, Mummies, Volcanoes, Lizards, Kittens and Horses.

Calling All Know-It-Aills Can you name an astronaut who has walked on the moon? Pretty good, but can you name all of them? Can you name all of the Marx Brothers? How about the Osmonds? The Bee Gees? The Jonas Brothers? Can you identify trees based on their leaves? How about sailor’s knots? Or semaphore signals? With questions from high culture to low, spanning science, language, history, sports, music, and more, this write-in quiz book is a lively parlor game, a challenging memory jogger, and an ego-boosting way to show what you know, all wrapped into one handy volume. So sharpen your pencils, put on your thinking caps, and prepare to show what you know.

Jake is determined to win the third grade science fair not only for the grand prize, but to beat the annoying class know-it-aills, as well.

As part of the unique, science Know-It-Aills! Series that features stunning covers and engaging text, this book puts the spotlight on Dinosaurs! Did you know that Tyrannosaurus was the fiercest meat-eating dinosaur? It wasn’t the biggest, but it was huge—7 tons (6.5 metric tons) of charging monster. At over 40 feet (12 m) long, it was a smart killer with sharp eyesight. Learn all about these prehistoric creatures and the paleontologists that study them. Awesome life-like illustrations and informative stat boxes, filled with interesting facts, make this 24-page book fun and exciting for young science enthusiasts age 4 and up! Titles in the Know-It-Aills! Series include: Butterflies, Crocodiles, Dinosaurs, Farm Animals, Safari Babies, Snakes, Sharks, Spiders, Whales, Wolves, Puppies, Wild Cats, Bugs, Birds of Prey, Fish, Frogs, Apes, Seals, Bats, Bears, Predators, Mummies, Volcanoes, Lizards, Kittens and Horses.

As part of the unique, science Know-It-Aills! Series that features stunning covers and engaging text, this book puts the spotlight on Seals!
