### The Medieval Pottery From The

MPRG was founded in 1975 to bring together people with an interest in the pottery vessels that were made, traded, and used in Europe between the end of the Roman period and the 16th century. Its remit has subsequently expanded to included the pottery of the 17th, 18th and 19th centuries from both sides of the Atlantic and beyond, as well as post-Roman ceramic building materials.

### Home - Medieval Pottery Research Group

For historical reasons, medieval pottery in Herefordshire has been classified according to a variety of systems. Although pottery from most sites in Hereford city and county has been classified according to the system developed by the late Alan Vince - see pottery in Herefordshire - other systems have been used for pottery in Leominster, Wigmore and other parts of Herefordshire.

## Medieval pottery | The Woolhope Club

A group of glazed medieval baluster jugs from the pottery kilns at Laverstock near Salisbury. This industry is known to have been producing vast quantities of all manner of everyday pottery during the 1200s and 1300s. Customers for these goods were to be found at the royal palace at Clarendon, near Salisbury and in the City itself. It is also known from sites all over southern England.

---

## Medieval Pottery | The Salisbury Museum

In East Anglia, pottery forms developed from the medieval products, often being made in the same potteries as previously. Many forms in this area copy contemporary Dutch wares. Decoration was less common, reflecting the need for speed in production, and many vessels have only a thin covering of glaze.

## Medieval pottery - CelticWebMerchant.co.uk

Pottery in the medieval period had been used for jugs and cooking pots and apart from tiles and roof furniture, little else, - plates, bowls, ornaments, were made of wood, pewter or other metal.

---

## Later post-medieval pottery | The Woolhope Club

As the medieval moved into the post-medieval, pottery became much plainer. These locally produced Suffolk redwares were some of the most abundant on site and found in almost every trench. Somewhere between the highly decorated vessels of the medieval period, and the plainer wares that came later, they produced a much wider range of forms than had previously been manufactured by rural potteries.
