Dairy products are commodities which have been produced by primary processing or secondary processing of milk. All mammals produce milk which contains the correct balance of nutrients with which to feed their young. This milk can also be produced and used commercially; for example sheep, goat and cows milk. 2. MAIN DAIRY FOODS YOGHURT CHEESE MILK FROMAGE FRAIS CREAM ICE CREAM 3.

Dairy products - SlideShare

How new technology is transforming dairy farming. 8 Feb 2018. There ' s a time-honoured romance to the agricultural way of life. The simple act of milking a cow harks back to a bygone era at the dawn of the agricultural revolution. And yet modern dairy farming is constantly searching for new innovations - and the latest can boost milk yields, enhance milk quality and reduce the costs associated with producing the white stuff.

How new technology is transforming dairy farming

According to some of the dairy experts, robotic technology is perfect for dairy farms because the milking process is so repetitive and precise. Since it needs to be done the exact same way every time, technology works to ensure that standards are met. For some systems, cows wear a collar or sensor technology around their neck.
