Introducing your baby to solid foods, also referred to as weaning or complementary feeding, starts when your baby is around 6 months old. Your baby should be introduced to a varied diet, alongside their usual breast milk or first infant formula. It can be confusing knowing when and how to start introducing solid foods.

*All you need to know about weaning - BBC Good Food*

Weaning is the process of gradually introducing an infant human or another mammal to what will be its adult diet while withdrawing the supply of its mother's milk. The process takes place only in mammals, as only mammals produce milk. The infant is considered to be fully weaned once it is no longer fed any breast milk (or bottled substitute).

Most little ones will be ready to wean at around 6 months old, but every baby is different! Babies are probably ready to start weaning when they can: Hold their head straight up on their own + sit confidently with support. Show good hand-eye coordination, getting all their favourite toys into their mouths.

*Weaning Guide | Ella's Kitchen*

Weaning your baby is simply the process of slowly introducing solid foods to your little one's diet to complement milk feeding. It's an exciting part of your baby's development and an essential one. At around six months your little one gradually begins to rely on solid food to get all of the nutrients they need to grow big and strong.
