Introduction. The Where Rivers Meet project is an Aggregates Levy Sustainability Fund project that is studying the archaeological resource at the confluence of the Trent and the Tame rivers in south-eastern Staffordshire. This is one of the most intensively quarried landscapes for aggregates extraction in the country.

Where The Rivers Meet. The Emergence of Sacred Geography in the Prehistoric Landscape. Rising on the southern edge of Biddulph Moor, the Trent is a major water course forming a natural boundary between the Midlands and Northern England before discharging into the Humber estuary. At about 8km north of Lichfield near Alrewas, the Trent is joined by the River Tame, its most important tributary and the main river of the West Midlands.
